

Sustainable Integration of Distributed Energy Resources for Power System Development

CIGRE SOUTHERN AFRICA REGIONAL CONFERENCE EXHIBITION 2019

The ninth CIGRE Regional Conference will take place at Misty Hills Hotel in Muldersdrift, Johannesburg from the 1st to the 5th of October 2019. This year the Regional Conference will also be joined by the International B4 Colloquium.

The conference will provide a platform to deliberate on sustainable integration of distributed energy resources for power system development. These discussions will be between power utilities, system operators, regulators, manufacturers, suppliers, universities, standardizing bodies, research laboratories and authorities on topics in the field of development of electrical systems in Africa.

The associated exhibition represents an excellent opportunity for product promotion directly to key decision makers on the sub-continent and further afield. For maximum exposure, the exhibition hall will be the location for all tea/coffee breaks and lunches, as well as the registration area. It is thus fully integrated with the other conference activities. A plan of the layout is attached. A shell scheme will be provided and each stand equipped with one plug point and two spotlights. A trestle table and two chairs can be provided by the venue.

KEY DATES:
